

Taxsutra & Kaasyapa Consulting Present 2-Day Virtual Master-Class Series on “International Taxation”

Dear Professionals,

As you are aware, the International Taxation landscape is going through a metamorphic phase of re-writing the tax rules. The pandemic has thrown all businesses into disarray and value chains have been severely impacted. At the same time, digitalisation of businesses has rapidly increased, throwing new opportunities to the corporate world.

On account of lack of consensus on Pillar 1 proposal of Unified Approach at OECD/G-20 BEPS IF, many countries including India have initiated unilateral measures for digital taxation. Post COVID-19, tax measures and reliefs are critical relating to unexpected duration of stay in countries by key-personnel impacting PE rules and personal taxation of individuals is a subject of importance which is addressed by OECD in its document released in 2020. In the same manner, transfer pricing rules relating to comparability analysis and benchmarking in the pandemic times is a topic by itself.

In the light of this backdrop, Taxsutra in association with Kaasyapa Consulting Private Limited [a global tax and business consulting company] is glad to present to you a riveting two-day virtual Master-Class Series on “Emerging Trends in International Taxation” **[18th & 19th March, 2021; 4 to 7 PM]**. This webinar-series is targeted to benefit corporate and industry players, tax practitioners and academicians.
